SUMMARY

First-year Computer Science & Business Systems (CSBS) student combining web development, data analysis, and business thinking. Experienced in building responsive websites and end-to-end data analysis projects, including data cleaning, exploratory analysis, machine learning model comparison, and translating technical findings into clear business recommendations. Seeking internship opportunities to apply and grow these skills.

EDUCATION

B.Tech, Computer Science & Business Systems | Christ College of Engineering (Autonomous), Irinjalakuda 2025 - 2029
Higher Secondary (12th) | Kerala State Board 2025

SKILLS

Technical: Python, C Programming, HTML, CSS, JavaScript, Front-End Basics, GitHub, Machine Learning & GenAI (Intro)

Data & Analytics: Pandas, NumPy, scikit-learn, Power BI, Tableau, Excel/Spreadsheets, Exploratory Data Analysis, Dashboard Creation, Data Interpretation

Web Development: Static Site Development, Responsive Layouts, Page Structuring, Basic UI Design

Tools: VS Code, GitHub, Power BI, MATLAB, Autodesk Fusion 360, Jupyter Notebook

Business & Thinking: Business + Tech Integration, Analytical Thinking, Understanding User Needs, Data-Led Decision Making

PROJECTS

Employee Attrition Prediction *Python, Pandas, NumPy, Matplotlib, scikit-learn, Jupyter*

- Built an end-to-end machine learning project analyzing HR data to understand and predict employee attrition (turnover).
- Cleaned and preprocessed data, performed exploratory data analysis, and trained/compared Logistic Regression, Random Forest, and Gradient Boosting models.
- Identified top drivers of attrition (overtime, monthly income, job role, tenure) using feature importance analysis.
- Translated technical results into a one-page, non-technical summary with actionable HR retention recommendations.

House Price Analysis *Python, Pandas, NumPy, Matplotlib, scikit-learn, Jupyter*

- Conducted exploratory data analysis on housing data to examine how area, room count, and amenities influence property value.
- Used visualization and statistical analysis to surface key insights driving price variation.

ResumeForgeAI *HTML, CSS, JavaScript, AI Integration*

- Built an AI-powered resume builder that guides users through key resume sections and organizes information into a clean, professional format.

Personal Portfolio Website *HTML, CSS, JavaScript*

- Designed and built a responsive personal website with a custom black-and-white aesthetic, scroll-triggered animations, and an in-page resume viewer to showcase projects and skills.

C Calculator *C*

- Developed a console-based calculator in C supporting addition, subtraction, multiplication, and division, with input validation and error handling.

CERTIFICATIONS

- Data Analytics Job Simulation - Deloitte Australia (Forage)
- GenAI Powered Data Analytics Job Simulation - Tata (Forage)
- Claude 101 & Claude Code 101 - Anthropic
- Digital Edge 101 - nasscom
- Cyber Job Simulation - Deloitte Australia (Forage)
- MATLAB Onramp - MathWorks
